Bonobo : The Forgotten Ape by Frans Lanting and Frans De ...

The bonobo, least known of the great apes, is a female-centered, egalitarian species that has been dubbed the "make-love-not-war" primate by specialists. In bonobo society, females form alliances to intimidate males, sexual behavior (in virtually every partner combination) replaces aggression and serves many social functions, and unrelated groups mingle instead of fighting.

But often they know less about a primate that is equally close and just as fascinating — the bonobo, “the forgotten ape.” Like chimpanzees, bonobos share more than 98 percent of DNA with humans. But bonobos, though sometimes violent, are more peaceable. They live in matriarchal groups and famously use sex as a social tool — to manage conflict and tension or even just say “hello.”.
