Controlling Basil Downy Mildew — Plant & Pest Advisory

In 2007, basil downy mildew (*Peronospora belbahrii*) was first identified in the U.S. By 2012, it was reported throughout the United States and into Canada. It's believed that this form was an evolution of an old strain which was only reported in Uganda in 1933, and that it evolved into a new and more aggressive variation.

Basil Diseases: Various pests - Cornell University

First observations of basil and cucumber downy mildews at LIHREC. Onset of downy mildew development at LIHREC is very regular, with first symptoms found between 4 and 19 August since 2009; in contrast, first symptoms of downy mildew were found in cucumber from 17 July to 7 September over the years.

Managing Basil Downy Mildew in the Greenhouse - Urban Ag News

Over the past 15 years, a number of downy mildew diseases have “emerged,” or maybe we are finally noticing them. The emergence of impatiens downy mildew has created quite a stir, leading to permanent changes in impatiens production and use. A similar situation with basil downy mildew has now led to all of the same changes.
