ISO 19840:2004 specifies a procedure for the verification of dry film thickness against the nominal dry film thickness on rough surfaces, including the adjustment of the instruments used, the definition of inspection areas, sampling plans, measurement methods and acceptance/rejection criteria. The procedure is based on the use of instruments of the permanent magnet and inductive magnet type, adjusted to zero and to a known thickness on a smooth surface.

Bing: Iso 19840 Wordpress

ISO 19840 requires roughly 10 measurements per 100 sq m and, again ignoring the first 100 sq m, gives a total of 30,000 measurements. PSPC is designed for ballast tanks but has a number of protocols for testing, depending on whether flat areas, stiffeners, regions around openings, etc., are tested.
