Review: Hypoxia-induced overexpression of CA IX and CA XII regulated by HIF-1 α decreases the cell-to-cell adhesion of hypoxic cancer cells and increases its migration through the extracellular matrix. Carbonic anhydrases interact with metalloproteinases and increase its activity, which leads to increased degradation of extracellular matrix and increased invasion to blood or lymphatic ...

Molecular Biology of the Cell is the classic in-dept text reference in cell biology. By extracting the fundamental concepts from this enormous and ever-growing field, the authors tell the story of cell biology, and create a coherent framework through which non-expert readers may approach the subject.

The Problems Book helps students appreciate the ways in which experiments and simple calculations can lead to an understanding of how cells work by introducing the experimental foundation of cell and molecular biology. Each chapter will review key terms, test for understanding basic concepts, and pose research-based problems. The Problems Book has been designed to correspond with the first ...

Kell and Ang et al. show that adaptor protein (AP)-1B expression in epithelial cells decreased the speed of collective cell migration. Consistent with this novel function, they demonstrate that AP-1B localized in membrane ruffles during cell migration using high-end fluorescence microscopy, stochastic optical reconstruction microscopy, and ...

Molecular biology is the study of molecular underpinnings of the processes of replication, transcription, translation, and cell function. The central dogma of molecular biology where genetic material is transcribed into RNA and then translated into protein, despite being oversimplified, still provides a good starting point for understanding the ...
