Software documentation - Wikipedia

Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. The documentation either explains how the software operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation include: Requirements – Statements that identify attributes, capabilities, characteristics, or qualities of a system. This is the foundation for ...

Program Documentation Standards

Documentation process standards define the process used to produce documents (example here). This means that you set out the procedures involved in document development and the software tools used for document production. You should also define checking and refinement procedures to ensure that high-quality documents are produced. Document process quality standards must be flexible and able to cope with all types of documents. For working papers or electronic memos, there is no need for ...
