### Section 5.3, Solving Trigonometric Equations

Section 5.3, Solving Trigonometric Equations Homework: 5.3 #7 {39 odds In Section 4.7, we learned about inverse trigonometric functions, which gave only one solution to equations like  $\sin x = 1/2$ . Now, we will focus on finding all angles that solve trigonometric equations. Examples Solve the following equations:  $1. 2\cos x - 1 = 0$   $2. \cos x - 1 = 0$   $2\cos x = 1$  ...

The Three-fifths Compromise was a compromise reached among state delegates during the 1787 United States Constitutional Convention. Delegates disputed whether and how slaves would be counted when determining a state's total population, as this population number would determine a state's number of seats in the House of Representatives and how much it would pay in taxes. The compromise counted three out of every five slaves as people, giving the Southern states a third more seats in Congress and a
