A smart contract is an agreement between two people in the form of computer code. They run on the blockchain, so they are stored on a public database and cannot be changed. The transactions that happen in a smart contract are processed by the blockchain, which means they can be sent automatically without a third party.

GRAM FREE SMART CONTRACT 2020 Legit & Paying - Bitcoins

...

With smart contracts, you simply drop a bitcoin into the vending machine (i.e. ledger), and your escrow, driver's license, or whatever drops into your account. More so, smart contracts not only define the rules and penalties around an agreement in the same way that a traditional contract does, but also automatically enforce those obligations.

"Smart Contracts, Bitcoin Bots, and Consumer Protection ...

The Bitcoin blockchain is not known for its ability to enable smart contracts. In fact, most developers creating smart contracts use a different blockchain, like Ethereum. But the truth is that the Bitcoin protocol can be used to create smart contracts. Particl.io, the blockchain eCommerce platform, is doing just that by using Bitcoin-based smart contracts to manage funds in their trustless escrow: Mutually Assured Destruction (MAD) escrow.
