I am currently facing a situation where I as an advocate of test driven development have to compete with an advocate of model driven software development (MDSD) / model driven architecture (MDA). In my opinion, code generation is a valuable tool in my toolbox and I make heavy use of templates and automation when needed.

Model-driven architecture (MDA) is a software design approach for the development of software systems. It provides a set of guidelines for the structuring of specifications, which are expressed as models. Model-driven architecture is a kind of domain engineering, and supports model-driven engineering of software systems. It was launched by the Object Management Group (OMG) in 2001.
